### ㉚ Sales display device.

㉛ A mask-like device (10; 30), for association with a box  
containing articles for display and sale and including an  
access aperture in one wall for removing articles from the  
box, can be fitted over such wall of the box and has a  
peripheral frame-like part, including outer wall parts (17)  
and inner wall parts (18, 19) which together define a rear-  
wardly-open channel surrounding an access opening which  
cooperates with the access aperture in the box, and a  
display panel (20; 40). Secure attachment of the device (10; 30)  
to the box is given by projections (22, 23, 24; 50; 51) included  
in the outer and inner wall parts (17, 18, 19).
