(54) **Electronic cash register with pre-settable modification operation.**

(57) This electronic cash register includes a means for counting the current time, a means for maintaining a management table in which is stored management data information such as data regarding unit numbers and prices and data relating to messages to be printed on receipts to be given to the customer, a means for storing modification data for the management data stored in the management table and also for storing the associated implementation time therefor, a means for inputting the modification data and the implementation time therefor, and a means for modifying the management data stored in the management table according to the modification data when the implementation time for implementing such modification data has arrived, as determined by the time counting means. Thereby, data for modification of the management data can be input in advance and such modifications can be implemented automatically when the appropriate time arrives. Thereby mental and physical strain on the operator of the electronic cash register are avoided, and the problem of implementing a large number of modifications of management data in a short time is also obviated.
