(54)

Electrical component.

(57)

An electrical component comprises a metallic conductor (21) and an inorganic conductive layer (24) thereon. The conductive layer has preferably been formed by a vacuum deposition method, and is bonded to the electrical conductor by an intermediate layer (22, 23). The inorganic conductive layer may, for example, be a non-linear material, a ferromagnetic, or ferromagnetic material, or a material exhibiting PTC or NTC behaviour.
