54 **Refiner disk assembly.**

57 A cartridge assembly (10) for loading into a multiple disk refiner which includes a plurality of coaxially aligned rotor disks (24, 25, 26), a plurality of coaxially aligned stator disks (28, 33) interleaved with the rotor disks (24, 25, 26) and an open-ended casing (58) holding the rotor disks (24, 25, 26) and stator disks (28, 33) in axial alignment. A plurality of retaining clips (50) are provided each of which has one end (55) received in a wall (57) of the casing (58) and has a pressure-applying opposite end (53) acting against the outermost stator disk (33) to hold the rotor disks (24, 25, 26) and stator disks (28, 33) in proper alignment for transit and for simplifying installation.

DOCUMENTS CONSIDERED TO BE RELEVANT			
Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl. 4)
