(74) Representative: Cowan, David Robert et al, WALFORD AND HARDMAN BROWN 5, The Quadrant Coventry CV1 2EL(GB)

54) Fork lift truck.

(57) A fork lift truck which has a mast (13) and a sub-frame (22) which moves up and down the mast is provided with a carriage (30) which is mounted for sideways movement relative to the sub-frame.

The sideways movement is achieved by rams (40, 41) connected between the sub-frame (22) and the carriage (30) and located to either side of a central region to provide better visibility.

The fork mounting is an integral unit to reduce the loss of lifting capacity resulting from add-on side shift arrangements.
