⑤④ **Ski with solar cells and electric and electronic devices.**

⑤⑦ The ski (1) has its top surface covered, wholly or in part, by photovoltaic cells (2) which by the effect of solar radiation, generate current which recharges a series of storage batteries 12 located preferably at a rearward zone 13 with respect to the bindings 14. The ski may be provided with an electronic speed sensing device, with electronically controlled safety ski bindings (14), and with electrically heated boots, which may be powered by the current generated by the solar cells (2) and/or by the storage batteries 12 which are recharged by those same cells.
