(54) **Process for treating textile fabrics and compositions for use therein.**

(57) A process for imparting crease-resistance or shrink-resistance to a textile fabric, by impregnating the fabric with a solution of a uron resin of the formula

where R_1 and R_2 are H, $-\text{CH}_2\text{OH}$ or alkyloxymethyl, and subsequently heat-curing the resin in the fabric, is carried out with a polyol having 2 to 4 carbon atoms, such as diethylene glycol, in the solution to inhibit the build-up of solids on heated elements which the impregnated fabric contacts during processing.
