㉑ Application method and application device.

㉒ In an application method and an application device, a liquid (3) to be applied is supplied to form a liquid reservoir (8) immediately upstream of the contact portion between a rotating bar (1) and a continuously-moving web (2) so as to apply the liquid (3) to the web (2). The effective application length of the bar (1) is set to be shorter than the width of the web (2) so as to prevent the liquid (3) from flying away and suction openings (11) are provided at both the end faces (10) of the effective application length part of the bar (1) so as to suck the excess portion of the liquid (3) along the end faces (10) of the bar (1).

FIG. 1

EP 0 213 323 A3

EUROPEAN SEARCH REPORT

EP 86 10 9111

DOCUMENTS CONSIDERED TO BE RELEVANT

Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl.4)

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons
& : member of the same patent family, corresponding document
