54 **Cooling circuit having a static evaporator for a refrigerating compartment with zones at different temperatures.**

57 A cooling circuit having a static evaporator for a refrigerating compartment with zones at different temperatures, said cooling circuit comprising a static evaporator which is made up of a number of elements (3, 4) that are fed in series by the compressor, a conveyor wall (8) being also provided within said refrigerating compartment (1), said wall (8) forming a way for the flow of descending cold air, a port (16) being also provided arranged at a lower part with respect to said conveyor wall (8), which port (16) creates a way for the flow of descending cold air through the zone of the refrigerating compartment adjacent to the housing zone (5) of the compressor.
