(54) **Fittings for displaying spectacles.**

(57) A display fitting for spectacles has a body (10) with a spine (16), formed with a series of recesses (18) one above the other, each recess suitable to receive the bridge (24) of a spectacle frame. Each recess (18) is flanked by a pair of holes (17) into which the ends of the earpieces (40) fit. When the spectacles have been mounted, a displaceable member (20,22) is moved to close off the mouths of the recesses and is locked, so that the spectacles cannot be removed until the member is unlocked and moved away from the recesses to enable the spectacles to be removed.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
