(54) An ironing apparatus comprising an electric resistance iron of the so-called cordless type.

(57) An ironing apparatus comprising an electric resistance iron (1) of the so-called "cordless" type, and a rest and electric supply base (2) that can be connected to the electric supply mains and which is provided with coupling means (7) that are able to allow the electric connection to be realized of the iron (1) with the electric supply mains when the iron itself is arranged on its base (2); the apparatus also comprising thermostatic means (13-15, 19) for regulating the temperature of said iron (1), such thermostatic means including temperature sensitive means (15), said ironing apparatus being also characterized in that said temperature sensitive means also comprise a temperature sensitive device (15) assembled within said rest and electric supply base (2) in such a position as to allow said temperature sensitive device (15) to come into contact with the ironing sole or plate (4) of the iron (1) when the latter is arranged on its base (2).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons
.....
& : member of the same patent family, corresponding document
