⑯ Connection system for a large number of similar apparatuses connected in parallel.

⑰ Connection system for a large number of similar apparatuses (A), connected in parallel to a common primary collecting set of inlet and outlet tubes (1, 2, 3), such as a header system. In order to increase the capacity use is made of a plurality of common secondary collecting sets (10, 11, 12), branching off from the primary collecting set (1, 2, 3), in which a certain number of apparatuses (A) is connected in parallel to each secondary collecting set (10, 11, 12), which apparatuses are installed in a single row at the side of said secondary collecting set (10, 11, 12).
