⑯ Constructional members such as glazing members and systems incorporating same.

⑯ The invention relates to a glazing member 1 which is a unitary non-inflammable moulded resin member which with an identical one 1a is used to hold a pane of glass 2 in an aperture in a door 3, the members 1 and 1a being held in position by nails 6. There is a flexible resin edge member 5 which is formed from an identical resin to that of the members 1, 1a but with the addition of an additive such as a flexiliser to render the resin flexible. The members 1, 1a, pane 2 and door 3 form a fire containing system.

FIG.1.

EUROPEAN SEARCH REPORT

Place of search BERLIN	Date of completion of the search 21-09-1987	Examiner KRABEL A.W.G.	
CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone	T : theory or principle underlying the invention		
Y : particularly relevant if combined with another document of the same category	E : earlier patent document, but published on, or after the filing date		
A : technological background	D : document cited in the application		
O : non-written disclosure	L : document cited for other reasons		
P : intermediate document	& : member of the same patent family, corresponding document
