54 Glazing product and process for its production.

57 A glazing product comprising a bilayer glass [1] composed of an inorganic glass layer [2] and a self-healing transparent elastic plastic layer [3] bonded to one side of the inorganic glass layer [2], and a gasket [4] formed along the periphery of the bilayer glass [1], said gasket [4] extending to cover the marginal edge surfaces of both the inorganic glass layer [2] and the elastic plastic layer and being made of a plastic formed by reaction and curing on said marginal edge surfaces.
