(54)

Fenestration system.

(57)

Fenestration system for application to window apertures (10) left in or between cladding panels (12) of walls. First parts (13) each fix by one surface (13A) to one side of the cladding panels to present an affixment surface (13B) about the window aperture (10). Second parts (14) each fix by first surfaces (14A) to said affixment surfaces (13B) of the first parts (13) to extend into said window aperture over the thickness of the cladding panels thereat, and present formations (14B, 14C) about said window aperture for directly accepting glass (20) or glazing units. The glazing units can be frames of opening lights. The affixment surfaces (13B) can be extensions of the one surfaces (13A). The second parts (14) are preferably composites of extrusions (14A, B, C).
