(54) **Enzymatic dishwashing composition.**

(57) The present invention relates to an enzymatic dishwashing composition comprising proteases and lipases. The lipases belong to a special class, i.e. those which show a positive immunological cross-reaction with the antibody of the lipase, produced by Chromobacter viscosum var. lipolyticum NRRL B 3683.

The use of the proteases and the lipases together provides for a synergistic cleaning effect of the dishwashing composition.
