54 **Apparatus for the maintenance of facades of buildings particularly of facades having wide glass surfaces.**

57 This invention occupies the technical field of apparatus for the maintenance of the facades of buildings particularly of facades with wide glass surfaces and comprises a framework (102, 2) characterized by means of delivery (100, 4, 80, 81) acting on the glazed surface (3) which operate simultaneously with drying means (108, 8, 9, 74) on said glazed surface.

furthermore the apparatus is equipped with means for the moving (73, 14, 30, 51) of the framework along the glazed surface and means (160, 16, 40, 41) to keep the framework constantly parallel to the latter.

the apparatus also comprises a control unit (7) designed to operate the framework and the means referred to.
