54 **Eyelash curler.**

57 An eyelash curler has upper and lower nipping jaws (7, 8). The lower jaw (8) is slidable up and down through a link mechanism (10, 11) connected to a manually operated handle (12) and a heater is provided for the upper nipping jaw (7). The heater and a blower device are contained in a gripping body (1) which is connected to power source. A flexible tube (17) extends from the blower and a nozzle (16) is connected to the flexible tube (17) and, in a preferred embodiment, has a downwardly flared configuration to allow hot air to be evenly distributed all over the outer surface of the upper nipping jaw (7).
