(54) **A container and set of parts for making same.**

(57) A set of parts for making a container 1 comprises a body part 2 for defining at least a base 3 of the container 1 when erected and two separate end parts 4, which in the embodiments shown are identical, for defining opposite ends of the assembled container 1, the body part 2 and end part 4 having respective interengaging means 5 whereby the parts 2 and 4 are permanently secured together when the container is assembled.

The interengaging means 5 comprise lugs 15 in a groove of each end part 4 and a slit 16 in the body part 2.
