54 Method and apparatus for manufacturing blind material.

57 Method and apparatus for manufacturing cellular blind material and in particular honeycomb blind material. A material feeding means (8) moves along and parallel to a stack (7) supporting means (3). The material feeding means feeds a layer of blind material onto the stack and a hot melt adhesive attaches the layer to the stack.

EP 88 30 0072

DOCUMENTS CONSIDERED TO BE RELEVANT			
Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl.4)
