D-8000 München 90(DE)(54) **Scroll type compressor.**

(57) A hermetic scroll type compressor (1) is disclosed which includes first and second cup shaped casings (10, 20) and a center block (30) therebetween. The first cup shaped casing (10) is provided with a fixed scroll (50) affixed within the first cup shaped casing (10), an orbiting scroll (60) inter-fitted at an angular and radial offset with the fixed scroll (50), a rotation preventing device (45) disposed between the orbiting scroll (60) and the center block (30). The second cup shaped casing (20) is provided with a drive mechanism. The first cup shaped casing (10) and the second cup shaped casing (20) are releasably and hermetically secured through the center block (30) thereby enabling disassembly, reassembly and independent inspection of the hermetic scroll type compressor components.
