(54) **Improvements in or relating to access floor structures.**

(57) An access floor structure has support means for supporting the panels above a solid floor. Each panel has a laminar panel element (1) fitted in said pan member (2) and resting on protrusions from the floor thereof, and a cover panel (9) fixed to said laminar panel element (1), the floor protrusions being so arranged as to increase the strength of the panel on two mutually perpendicular axes thereof.
