⑯ Representative: Lees, Clifford et al
APPLEYARD, LEES & CO. 15, Clare Road
Halifax West Yorkshire, HX1 2HY (GB)

⑯ Improvements in or relating to textile carding.

⑯ The taker-in roller (16) of a cotton type carding machine is provided with a trash separator in the form of a knife blade (70) pointing towards the periphery of the card-clothing on the roller followed by a card-clothed top (78) co-operating in point-to-point fashion with the card-clothing on the taker-in roller. A screen (90) extends below the feed plate (12) of the machine, spaced from the knife blade (70) and a second screen (98) extends down from the knife blade so that a region of "dead air" is created to the rear of that part of the taker-in roller which travels between the feed plate (12) and the knife blade (70).

The present search report has been drawn up for all claims					
Place of search	Date of completion of the search	Examiner			
THE HAGUE	12 APRIL 1989	MUNZER E.			
CATEGORY OF CITED DOCUMENTS					
X : particularly relevant if taken alone	T : theory or principle underlying the invention				
Y : particularly relevant if combined with another document of the same category	E : earlier patent document, but published on, or after the filing date				
A : technological background	D : document cited in the application				
O : non-written disclosure	L : document cited for other reasons				
P : intermediate document	& : member of the same patent family, corresponding document
