⑤④ **Patient mover.**

⑤⑦ An apparatus for use in moving a small child who has been injured or sick. The apparatus includes a base (10), and a flexible flat board (32) mounted to the base. The ends of the board can be moved to a raised position to accommodate the child. The apparatus also includes supports (47, 48) for supporting the ends of the board when they are in the raised position. The base, board, and support means have pluralities of openings (20, 21) for use in immobilizing the child and in securing the apparatus to a stretcher.
