54 **Automatic machine for cutting to size, particularly for tapes and the like.**

57 The present invention relates to an automatic machine for cutting to size, particularly for tapes and the like, which comprises an assembly (2) feeding portions of tape (15) to at least one cutting assembly (10) constituted by a fixed blade (11) operatively engageable by a movable blade (12). The peculiarity of the invention resides in that it comprises eccentric means (20) interacting with said movable blade (12) for its translatory motion with respect to said fixed blade (11) from a resting position, wherein said movable blade (12) is spaced from said fixed blade (11) for the insertion of the portion of tape (5) to be cut, to a cutting position, wherein said movable blade (12) interacts with said fixed blade (11) to perform the cutting of the tape (5), and/or vice versa.
