54 **Liquid filled package having integral sealed application brush.**

57 A liquid filled sampler package containing e.g. an air hardenable liquid is described which comprises an integral, sealed application brush (14). The package comprises a flexible, generally flat, pouch (11) having an overlapping longitudinal seam and fin-seals at opposite ends containing the liquid to be dispensed from a reservoir (12) contained therein, an outlet (13) at one of the reservoir in airtight fluid communication with one end of a brush (14) having an axial open bore (16) therethrough through which liquid can flow for ultimate application to a surface, and a generally flat cover (15) forming an extension of one of the fin-seals (17) and detachably connected to the pouch to cover and seal the brush from the air.
