54 **Flexible dispenser packet for premoistened towelettes.**

57 The invention comprises a sealed flexible plastic packet having an opening through the top of said flexible packet container, a resealable tab (2) in position to seal off said opening, said packet containing within it a rigid tray insert (9) comprising a top (3) and side walls and having a cavity comprising a base wall and peripheral walls extending from said base wall to said top of said rigid tray insert and said base wall having an opening transversely positioned relative to a presented edge of one of a plurality of disposable pre-moistened towelettes (7) removably positioned in the space beneath said rigid tray insert, whereby access is provided through said opening to said towelette for removal of said towelette from said container such that upon removal of said towelette from said container the next succeeding towelette is presented for subsequent removal from said cavity.
