(54) **Electrical connectors.**

(57) A one-piece cover (28,70,74) for covering open parts of passageways (12) on two opposite sides of an electrical connector housing. The cover has two hinged cover portions (30) for folding the cover around the housing. Each cover portion has projections (38) for engagement within closed parts of the passageways and is also resiliently flexible to enable the cover portion to be flexed into position with apertures (40) in the cover portion receiving extensions (26) of walls (18) of the housing which define the open parts of the passageways.
