**I-20159 Milano(IT)**(54) **Apparatus to deliver hot air.**

(57) The apparatus comprises a protection casing (2) adapted to be fixed to a wall (3) and housing an air delivery unit (4). The protection casing (2) has a base wall (6) from the upper part of which a dome-shaped portion (8) projects and two side portions (9) extending parallelly from the lower part of said dome-shaped portion. The air delivery unit (4) is contained between the dome-shaped portion (8) and the side portions (9) and is oscillatably pivoted to the latter to be displaced, by a slight angular oscillation, from a non-use position to a use position. When in its use position, said air delivery unit (4) is actuated upon command of a pushbutton (5) housed in casing (2) and operated by said delivery unit itself.
