④ Assembly of modular conductive bus-bars coupled in a polyphase system for supplying modular breakers and electrical apparatus.

⑤ There is disclosed an assembly of modular conductive bus-bars coupled in a polyphase system for supplying modular breakers and electrical apparatus, which assembly comprises a plurality of modular conductive bus-bar sets removably associated with one another, each set including a section member, a base bar member (1), a plurality of electrical branching elements (3, 4, 5, 6, 7), removably selectively associated with the base bar (1), and a thickness levelling bar (13) removably associated with the base bar and electrical branching elements, resilient means (17) being moreover provided for removably coupling the several modular bus-bar sets in order to make the polyphase system.
