I-20122 Milano(IT)

54 **Self-enveloping forms.**

57 In a continuous form for correspondence of the self-enveloping type, each page has, on at least one of its sides, at least one lateral extension (7,7',8,8') containing an area for the application of an adhesive. After having removed the tear-off sections and having folded and closed the page, the part or the parts containing this adhesive area are the only parts which remain, the said parts having been folded and sealed to one or more prefixed corresponding adhesive carrying areas of the page.
