(54) **Drainage device particularly for washing machines, for preventing water leakage during extraction of the filtration member.**

(57) A device particularly for washing machines, for preventing water leakage while extracting the filtration member from such machines. The device comprises a hose (11) which is connected to a suitable point of the delivery pipe (6) from a pump (4) and which, at that end (17) distant from the end (12) at

which said connection is made, comprises a part (18) which acts as a shutoff member and carries elastically deformable means (23) for its removable securing to a front part (2A) of the housing (2) of the washing machine (1).
