(54) **Album for transparent photographic reproductions, having a lighting device built-in.**

(57) An album for transparent photographic reproductions, said album comprising a member (12) containing batteries (11) which are capable of supplying power to at least one lamp (20) that is also contained within the member (12) itself; a specular surface sheet member (10) which reflects incoherently the light beam onto the rear part of a transparency diffuser rigid material sheet (9); a positioning or relief member (14) for putting in position said specular surface sheet member (10) at an optimal angle for

obtaining the best diffusion of the light beam coming from said at least one lamp (20) towards said transparency diffuser rigid material sheet (9); and a balance-pivoted rigid sheet member (15), on whose top a set of rings 16 is assembled, said rings gathering together a plurality of transparent folders (6, 17, 18) to be put in turn on the illuminated plane consisting of said transparency diffuser rigid material sheet (9) for viewing the photographic material.
