Maximilianstrasse 58
D-8000 München 22(DE)

54 **Fuse puller.**

57 A fuse puller for pulling a compact blade-type fuse from a female terminal. The fuse puller has a box-like shape with two pen ends. One end, the fuse insertion end, has projections with inclined surfaces facing the opening to ease insertion of the fuse. The puller is made of a flexible resin so that it flex as the puller is pushed onto the head of the compact fuse. The projections grab a shoulder of the head of the fuse, pulling the fuse from the female terminal as the fuse puller is pulled by hand. The fuse is then discharged from the opposite open end of the fuse puller.
