(54) **Portable, folding book-rest with adjustable incline.**

(57) The object of this invention is the realization of a portable, folding book-rest in book form, with adjustable incline which can be used for any reading and/or writing situation. It consists essentially of an adjustable, reclining support on which the text is placed. The support is hinged on a horizontal-supporting base (4) and set on a bracket (7). The bracket is conveniently hinged on the horizontal

base and can rotate to a certain degree supporting the text-supporting base (1) and providing, through its range of movement, the incline for the text itself. The text-supporting base contains useful devices which, together with the above-mentioned characteristics, give this invention its individuality.
