(57) Disclosed is a light-sensitive silver halide color photographic material, comprising a support, silver halide emulsion layers, which are respectively a blue-sensitive, green-sensitive and red-sensitive, and a yellow filter layer which are provided on the support, wherein the material has a DIR compound, the yellow filter layer contains a yellow dye, and at least

one of the blue-sensitive, green-sensitive and red-sensitive silver halide emulsion layers has a single layer constitution. According to the present invention, a light-sensitive color photographic material suitable for full color photographing can be prepared.
