- (S) Light-sensitive silver halide color photographic material.
- (57) Disclosed is a light-sensitive silver halide color photographic material, comprising a support and silver halide emulsion layers which are respectively blue-sensitive, green-sensitive or red-sensitive and are provided on the support, wherein the material contains a DIR compound and at least one selected from the group consisting of a film hardner which acts through activation of carboxyl groups, a chlorotriazine type film hardener, a bis(vinylsulfonylalkyl)ether type film hardener and at least two of the blue-sensitive, green-sensitive and red-sensitive silver halide emulsion layers have single layer constitutions. According to the present invention, a light-sensitive color photographic material suitable for full color photographing can be obtained.
