(54) **Cabinet for household appliance, particularly for washing machine.**

(57) The present invention refers to a cabinet for a household appliance, particularly for a washing machine, comprising a main part (1) and a basement (2); the main feature of the cabinet is that its main part is aesthetically finished on the four sides and that the basement has a structure which allows to get out at least one of the pipes (9,10) for the supply and the drain of the washing liquids in a position preferably approached to a wall of the room where the household appliance is located, whichever is the cabinet side approached to the wall in the use of the household appliance.
