I-20123 Milano(IT)(54) **Foot Securing device, particularly for ski boots.**

(57) A foot securing device for ski boots composed of a shell (3), a front quarter (1), a rear quarter (2) and a rear presser (17). The presser (17) is rearwardly provided with an inclined surface (16) engaging an inclined plane (15) of a pawl (14) which is rotatably associated with a threaded rod (4) which can be rotated directly by the skier. At least one traction element (18) is associated with the pawl (14) and, by embracing the foot instep region, creates a clamp-like locking effect on the skier's leg when the threaded rod is rotated.
