(54) **Method of preserving composition for silver halide photographic light-sensitive material.**

(57) A method for preserving a composition for silver halide photographic light-sensitive material is disclosed. In the method, the composition is preserved in a temperature within the range of from 0° C to the freezing point of the composition. The method is preferably applied for preserving a silver halide photographic emulsion, a oil-in-water type dispersion such as a oil-soluble coupler dispersion or a coating solution of the emulsion prepared to be coated.
