(54) **Semi-fixed covering.**

(57) A semi-fixed covering for an automobile-carrying wagon, a covering which is made up of covering sections (2) which can be moved outwards from the wagon center line (P) in order to provide walking space and space for opening automobile doors in a loaded wagon. The covering sections (2a-h) are fastened to the wagon frame (5) by means of pivot-arm

pairs (3, 4). The pivot arms are at a distance (H1), parallel to the wagon side (7), from each other, and they are each hinged at one end to the wagon frame and at the other end to the covering section, in such a manner that the pivot axes (11', 12', 9', 10') of these hinge articulations (9-12) are mutually parallel and perpendicular to the said distance (H1).
