## <sup>54</sup> Panelled door.

© A panelled door, for example for a garage, devised to allow fabrication in a range of different sizes while being of sound construction and attractive appearance, comprises a box-section frame (10) having a peripheral flange (14) extending into the plane of the door and a flat zone (13) of reduced thickness perpendicular to the plane of the door. One or more, for example three, door panels (15; 20; 23, 24) are located within the frame against the rear of the peripheral flange (14) and are secured in that position by fixing means (18; 22; 25) passing through the flat zone (13).
