W-8000 München 80(DE)(54) **Method of manufacturing thermal head.**

(57) A method for manufacturing a thermal head comprising the steps of forming a heat resistant resin layer (12) on the surface of a substrate (11), removing a part of the heat resistant resin layer (12) by a photochemical reaction using an excimer laser beam having a wavelength of 150 to 400nm, thereby exposing a part of the substrate (11), forming a heat-generating resistive layer (14), an individual electrode (15) and a conductive layer (16) on the heat resistant resin layer and the exposed part of the substrate (11).
