(54) **Connector for wiring in a vehicle.**

(57) Disclosed is a connector for wiring in a vehicle comprising : a connector body (50) consisting of either a male or a female connector attached to a terminal end of a harness ; engagement projections (5,6) formed on the periphery of the connector body and engaging with at least the two side edges of a hole (a) in a vehicle panel (A) ; and a movable piece (4) pressed into contact with the inside surface of the hole (a) in the vehicle panel (A), due to the repulsion spring force thereof, to thereby firmly engage the engagement projections (5,6) with the hole (a) in the vehicle panel (A).
