(54) **Cassette for tape printing device.**

(57) A cassette to be detachably received in a tape printing device having a printing member (23) to print on a tape-like recording medium (3), means (42) for feeding the recording medium, and a cutter (51) for cutting the recording medium at a cutting position, said cassette housing at least two tapes in a wound state, one of the tapes being a tape-like recording medium (3), to be forwarded to a printing position of the cassette at which, when the cassette is in the device, printing can take place on one of its surfaces using the printing member, characterised by a tape holder (50) arranged on the cassette upstream of the cutting position at which said cutter (51) cuts, and downstream of said printing position, so as to guide the recording tape to the said cutting position.
