I-20123 Milano(IT)(54) **Upper structure particularly for items of footwear.**

(57) The present invention relates to an upper structure comprising at least one first water-repellent and transpiring inner layer (9) coupled, by means of dry powders, to at least one outer second layer (10) of water-repellent and transpiring woven fabric. This structure allows to manufacture an item of footwear which simultaneously allows optimum foot transpiration and prevents the infiltration of water from outside.
