(54) An anti-liquid splash device.

(57) An anti-liquid splash device comprises a pair of substantially parallel supports (23, 25). The device is provided with attachment means for attachment to a wall (27) defining a receptacle or flow passage. Respective deflectable floats (11, 13) are connected to the supports and can be arranged to extend towards one another from the supports (23, 25) across substantially the entire surface of liquid in the receptacle or flow passage. The floats (11, 13) may be provided with means for releasing a fragrance.

FIG. 8a

Office

### CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid.  
namely claims:
- No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions.

namely:

see sheet -B-

- All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid.  
namely claims:
- None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims.

namely claims:

1-5

Office

EP 92 30 2719 -B-

**LACK OF UNITY OF INVENTION**

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-5: anti-liquid splash device comprising an arrangement of supports and deflectable floats
2. Claims: 6-9: anti-liquid splash device including means for releasing a fragrance.
