(57) The present invention concerns means for carrying bags and the like travel packages, and particularly to rolling aids for facilitating transport of such packages.

According to the invention there is thus provided a pocket size roller device (10) for facilitating the mobilizing of suitcases and the like loads. The roller is adapted to be releasably attached to the bottom of a suitcase (50) when in use and to be removed when not in use. The roller comprises a block shaped housing (12), a pair of distanced rollers (18,20) mounted to the housing, and a loop forming strap (34) or similar means affixed to the housing and adapted to be tightened around the suitcase (50) for releasably fastening the housing to the bottom of the suitcase.
