(54) **Collapsible gate with built-in antitheft means and method for making it.**

(57) A collapsible gate with a built-in antitheft means comprises a plurality of uprights (2) which, at the ends thereof, are engaged with a guide top rail (5) and a guide bottom rail (6), the uprights (2) being movably connected by means of scissors (3) crossed rods.

The main feature of the invention is that each of the uprights is formed by a pair of C-shape section members, opposite to one another and coupled by means of connecting pins welded, at the end portions thereof, to the inner surface of the central wall of the C-shape section members, at least a portion of the pins forming an articulation fulcrum or pivot center for the rods.
