(57) A multi-seal flexible recloseable package (10; 200) having a tapered product cavity formed in one (14; 205) of the package sidewalls has a generally wedge-shaped cavity (18; 218) into which a doubled-over shingled stack (22) of the food product slices (12; 212) are sealed. The package has a first peelable hermetic seal (42; 246) located next to an access edge of the product cavity and a second, recloseable seal (26; 226) positioned directly above the

peelable seal (42; 246). Vertical extensions (71, 72; 220, 240) of the package sidewalls are sealed together at their tops to form a third package seal (78; 258) which has a tamper-evident tear strip (90; 288). One or more openings (74; 254) in the vertical package extensions (71, 72; 220, 240) in the vertical package extensions (71, 72; 220, 240) allow the package to be supported on a display hook.

Place of search THE HAGUE		Date of completion of the search 29 DECEMBER 1992	Examiner LEONG, C. Y.
<b>CATEGORY OF CITED DOCUMENTS</b>			
X : particularly relevant if taken alone			
Y : particularly relevant if combined with another document of the same category			
A : technological background			
O : non-written disclosure			
P : intermediate document			
T : theory or principle underlying the invention			
E : earlier patent document, but published on, or after the filing date			
D : document cited in the application			
L : document cited for other reasons			
* : member of the same patent family, corresponding document
